Medicare Part D Star Ratings Quality Measures

Performance and quality measures are used by the Centers for Medicare & Medicaid Services (CMS) to evaluate health and drug plans and to provide information for Medicare beneficiaries concerning health and drug plans.

CMS Medicare Part D Quality Measure	Description	Physician Collaboration
Drug Adherence: 3 Categories: <ul style="list-style-type: none"> • Oral Diabetes Medications, • RAS inhibitors (ACE/ARB), • Statins 	The percent of Medicare Part D beneficiaries 18 years or older who adhere to their prescribed drug therapy. Adherence is defined as the proportion of days covered (PDC) of 80 percent or more during the measurement period.	<ol style="list-style-type: none"> 1) Discuss the importance of medication therapy. 2) Prescribe maintenance medications for 90 days per script. 3) Promote mail service.
Statin Use in Persons with Diabetes	The percentage of Medicare Part D beneficiaries 40 – 75 years old who were dispensed at least two (2) diabetes prescription fills and received a statin prescription fill.	Consider prescribing a statin medication to diabetic patients within the specified age range who meet the American College of Cardiology/American Heart Association (ACC/AHA) guidelines for moderate to high intensity statin therapy for primary prevention.

Key High-Risk Medications

High Risk Medications (HRMs) are identified as medications which may require additional monitoring, may need to be dose adjusted, or may be inappropriate in certain older adults. Please use caution in prescribing medication categories listed below.

Key High-Risk Medications	
Drug Class	Drug Name
Non-Benzodiazepine Hypnotics	zolpidem, zolpidem ER, zaleplon, eszopiclone
Skeletal Muscle Relaxants	cyclobenzaprine, carisoprodol, methocarbamol, metaxalone, chlorzoxazone, orphenadrine
Antidepressants, Tricyclic	amitriptyline, doxepin, clomipramine, imipramine
Estrogen/Progestin	estradiol, Premarin®, megestrol, norethindrone acetate-ethinyl estradiol, esterified estrogen
Antiarrhythmic	digoxin (>0.125mg/day), disopyramide
First Generation Antihistamines	promethazine, hydroxyzine, brompheniramine, chlorpheniramine, doxylamine
Sulfonylureas, long-acting	glyburide, chlorpropamide

Common Generic Medications available at Tier 1

A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generally, generic drugs cost less than brand-name drugs. Today's Options PFFS has commonly prescribed generic drugs available in **Tier 1 with the lowest member cost-share.**

Key Tier 1 Generic Drugs	
Drug Class	Drug Name
ACE Inhibitors/combinations	lisinopril, lisinopril-HCTZ, benazepril, benazepril-HCTZ, amlodipine-benazepril, captopril, captopril-HCTZ, enalapril, enalapril-HCTZ, fosinopril, fosinopril-HCTZ, moexipril, moexipril-HCTZ, perindopril, quinapril, quinapril-HCTZ, rampiril,trandopril,
Angiotensin II Receptor Antagonist/combinations	irbesartan, irbesartan-HCTZ, losartan, losartan-HCTZ, olmesartan, olmesartan-HCTZ, amlodipine-olmesartan, olmesartan-HCTZ-amlodipine, valsartan, valsartan-HCTZ, amlodipine-valsartan, valsartan-HCTZ-amlodipine
